

Amecath

Long term dual lumen
Haemodialysis Catheters

Permthane Dual Lumen Catheter

Permthane Y split Dual lumen Catheter

Made from biocompatible Carbothane

Polyester cuff to ensure proper anchoring of catheter to subcutaneous tissue.

Extension lines to resist repeated clamping.

Multiple threads Luer end stands long term use.

Available in steeped and split tip.

Available in straight and pre-curved shapes. Pre-curved shaped catheters lie nicely over the clavicle.

CE
0086
EN ISO 13485

Split tip catheter design provides easy catheter insertion by a single tunneling procedure through use of one outer wall configuration that ends with two fully independent catheter tubes which are joined together but can be separated by splitting which enhance free floating of each lumen.

® PATENTED manufacturing property of AMECO MEDICAL INDUSTRIES
U.S PATENT No. 7740780

Catheter feature:

The design to guarantee soft contact and long potency.
PERMTHANE (Carbothane) material suitable for long use.
Carbothane provides excellent tensile strength
Available with Standard stepped tip or split tip.
Available in straight and pre-curved shape.
Extension lines stand repeated clamping and declamping.
Safety clamp with Heparin priming volume indicator.
Multiple thread female luer end.
Injection caps.
Variety of sizes, lengths and shapes.

Kit features:

Length marked Nitinol core guide wire with advancer.
Long tapered tip dilators with stopper to avoid over insertion.
Introducer needle.
Scalpel # 11 for small snipping.
Curved tunneling stylet.

Kit contains:

Permthane dual lumen Catheter.
Length marked Nitinol core J- end guide wire with advancer.
2 Vessel dilators.
18G - 7cm Introducer needle.
5 CC Syringe.
Scalpel # 11.
Size matched tear away sheath dilator.
Curved tunneling stylet.
Injection caps.
